Marking Machines

Hot Printer MG 10 D

The hot printer MG10 D is specially for round cable, wire, tubes etc.

We press, for a short moment foils with different colours with heatable marking wheels signs on the material.

The marking wheels are with 27 or 40 symbols. The symbols are 1,5 up to 3,0 mm high. It's possible to make with special marking disc rings around the material.

The Material feeding is by a SM15 or a cut and stripping machine. The print impulse is an potential free contact. The temperature and printing time is regulated in a separate electronic box.

Technical Data MG 10 D

Material feeding	by cutting machine SM15 or by cut and strip machine
Material diameter	1,5 up to 15mm
Print impulse	- by foot switch - by Cutting machine type SM15
Power supply	230V/50-60Hz/10A
Dimension (LxWxH)	830x300x370 mm
Compressed air supply	6bar
